# VOTE YES! CROSS ISLAND PARKWAY

Close of Petition: June 18, 2008

As a valued community member who frequently travels across Johns Island, please sign this petition in favor of the Cross Island Parkway through Johns Island. The Kiawah Island Community Association, the Town of Kiawah Island, the Town of Seabrook Island and the Seabrook Island Property Owners Association are in favor of the parkway.

Charleston County Council is considering a proposal to move forward with a controlled access parkway through Johns Island. As proposed, the cross-island parkway would maintain safety for persons living and working on the island and keep vehicular traffic volumes low on both Bohicket Road and River Road. In addition, it would help support the rural character of Johns Island and preserve its grand roadway oaks. A Washington DC based transportation group, TRIP, ranked River Road 5<sup>th</sup> and Bohicket 6<sup>th</sup> in a list of the state's 100 most dangerous roads. 28 people died in traffic accidents on River and Bohicket Roads between 2002 and 2006. The major problems are the volume of vehicular traffic and the proximity to roadside grand oaks! The slightest mistake leaves no margin for driver error. By 2030, the Council of Governments estimates that traffic volumes will increase 29% on Bohicket Road and 254% on River Road. A cross-island parkway is needed to remove 20,000 trips per day from Maybank, Bohicket and River (if built now, it would remove volume of 12,000 trips per day). More importantly, a new road would provide appropriate lines of sight and road shoulders, which current roads cannot do, even if County were to build parallel roads to widen existing Bohicket and River. Also, building parallel to Bohicket and River would disrupt and displace far more residents, small businesses and churches than a cross-island parkway through Johns Island.

Add your name to a petition to say YES to the Cross-Island Parkway and reserve your rights to keep the quality of life on Johns and Wadmalaw Islands!
